

PolyAlert

Polytron's Newest Wireless Alarm Management System

Getting Your Staff Connected

When a machine stumbles, seconds cost dollars!
The quicker your staff is alerted of the problem, the sooner they will have your system producing again.

KEY FEATURES

Customized user interface

Alerts directed to specific operator/technician

Instantaneous updates for:

- . Alarms
- . KPIs
- . OEE
- . Uptime
- . Anything you monitor

Alerts via:

- . PDAs
- . Radios
- . Mobile phones
- . E-mail
- . Webpage

Necessary for lean manufacturing

- Using state of the art WiFi technologies, PolyAlert equips your operations with the information they need to keep your system producing.
- PolyAlert piggybacks on your data collection and logging framework.
- PolyAlert is easily configured with just a few mouse clicks to display vital system information.
- PolyAlert PDA comes with a rugged case, a choice of audio options, including wired headphones, Bluetooth earpiece or PDA mini-speaker.
- PolyAlert runs on Microsoft Windows Server and uses Microsoft SQL Server 2005. The PolyAlert client runs on Microsoft Windows Mobile.
